MOPPET VIDEO™

A New Market to Increase Your Profits

Enter-Tech and Moppet Video™ unveiled a new concept to the coin-op industry in November of 1982 by introducing video games just for the 3 to 9 year old. This concept has expanded into a successful line of games that appeal to a fresh new market which represents a key potential for new earnings and image building in our industry.

Each Moppet Video™ game is geared toward the 3 to 9 year old level of complexity. They are all non-violent themes that youngsters can identify with. The games are simple, yet offer reward for improving skill levels to encourage repeat play. The average young player will enjoy 3 to 5 minutes of entertainment on a Moppet Video.™

New and Different Locations

Moppet Video™ games offer a way to entertain younger children while their parents are out on appointments or shopping.

This gives a selling benefit to many new types of locations such as medical and dental offices, restaurants, retail stores, ice cream parlors, pizza places, skating rinks, bowling alleys, and

even bank lobbies! Because Moppet Videos™ are small, they are more convenient to place in location. They will generate income from a minimal floor space requirement.

Moppet Video™ games are a hit with Pizza Time Theater,™ ShowBiz Pizza,™ and now can be found in Disneyland and DisneyWorld as well.

A Positive Image

Parents and their children appreciate the Moppet Video™ games. Moppet Videos™ create positive reinforcement as the youngsters play these games that were developed to meet their level of complexity as well as size.

Remembering the younger children creates a positive image in the community and, therefore, helps to build a better image for the location and the industry in general.

Profit From Longer Earning Life

Moppet Video™games may not be the biggest money maker in the location. In fact, they probably won't be.

Moppet Videos™ will earn *consistent* income over a *long* time. They are comparable to kiddie rides in earning life because they are not subject to the same "hit syndrome" as the games for teens and adults. Moppet Video™ games will stay on location, earning money, long after the hits come and go.

The Finest in Design and Service

Moppet Video™ will be featuring many fine games, including games with licensed characters like the Berenstain Bears™ and Popeye™

All games are developed and manufactured by Enter-Tech in our facilities in Tempe, Arizona.

Our fully trained factory technicians are available for technical assistance by calling toll free 800-528-1409.
